UNIVERSITY OF SINDH, JAMSHORO

NAME	MASOOMA AKBAR MEMON
ROLL NUMBER	2k19/SWEE/35
DEPARTMENT	(BS) SOFTWARE ENGINEERING (EVENING)
SUBJECT	MOBILE APPLICATION DEVELOPMENT

Android Mobile Application Development (Using Android Studio 2021)

MAD LAB Manual (100 Marks) By:
Dr. Zeeshan Bhatti

Each student is required to complete the following Lab project works individually. For each project, take Screenshot of the code and results/App output, and create PDF file and Upload it on LMS.
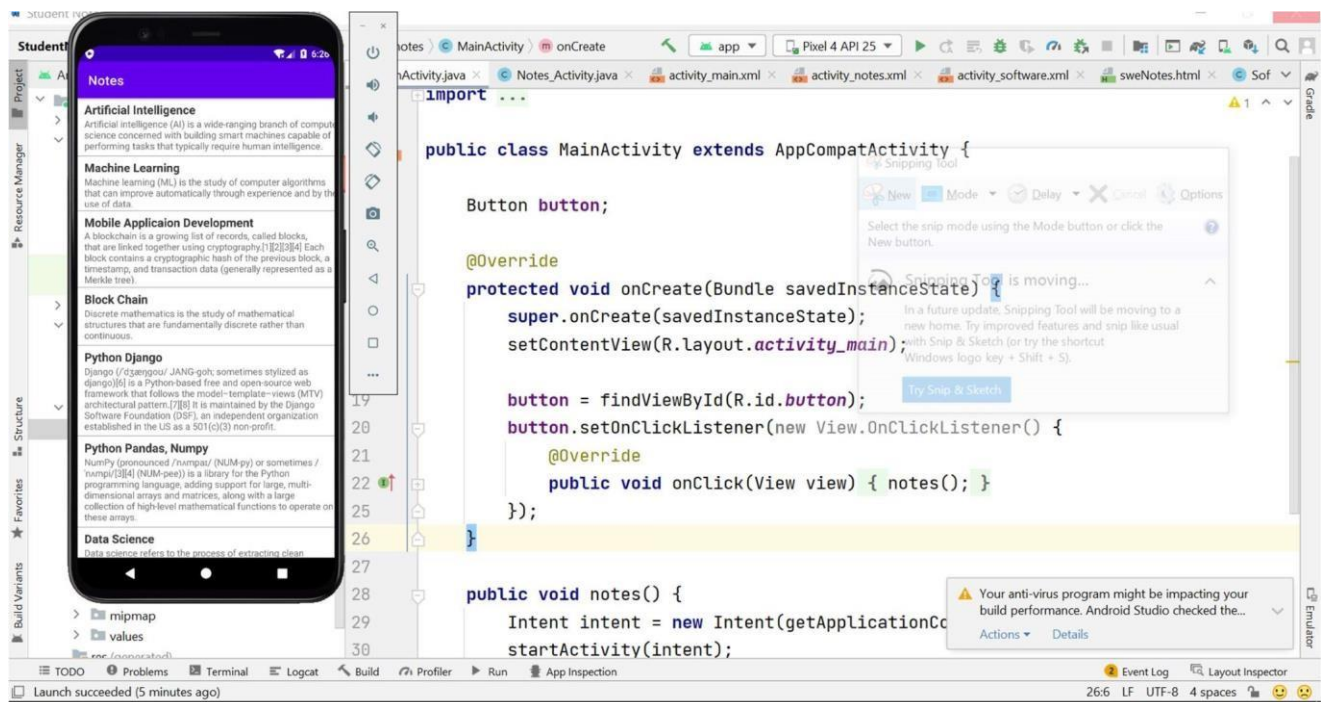

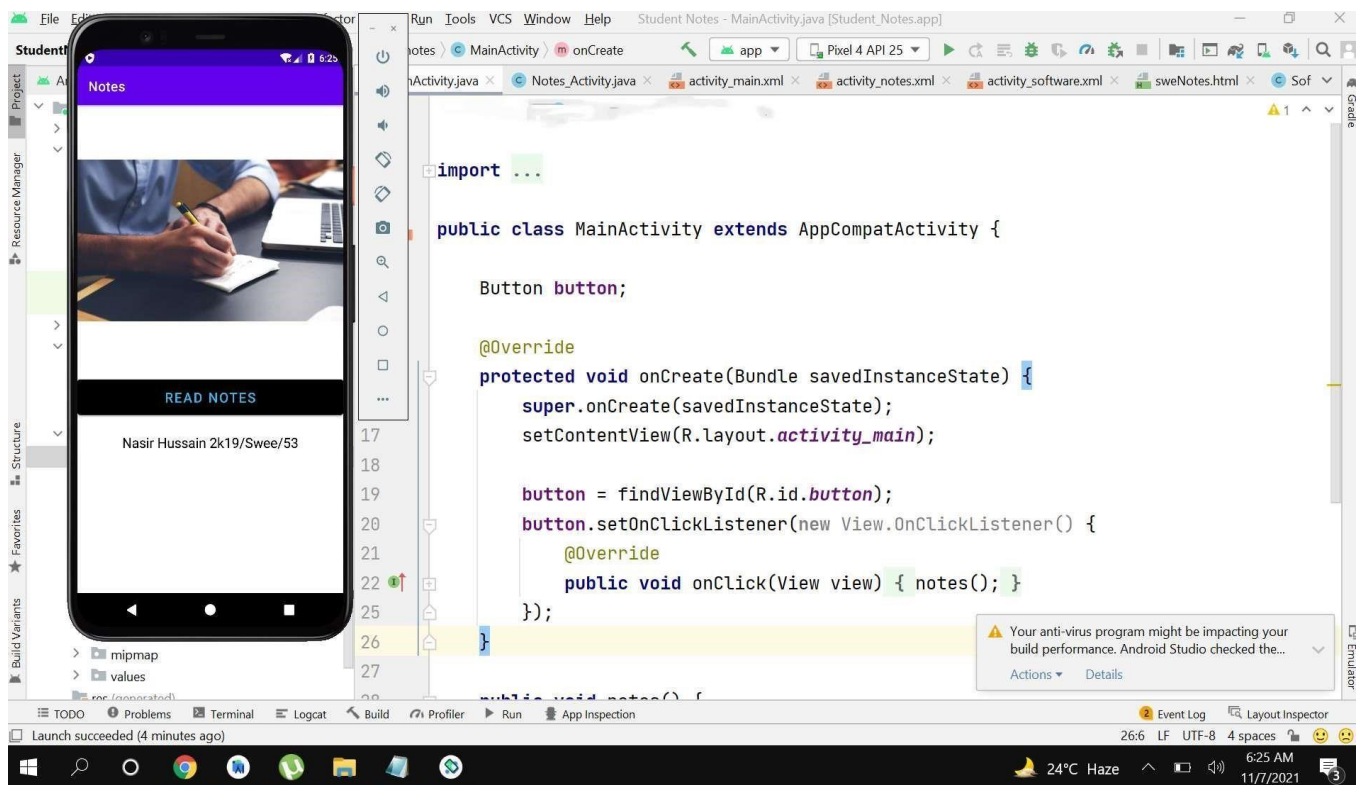

It is required/Compulsory for each student to Watch the given Video Lectures/Tutorials in order to complete the lab projects. Write your Name/Roll Number and status of project (completed) under the comments of each video.

---

LAB Projects for Week-3

Website for Notes on Android studio

Task 11: Create a simple Android App called "University Students Notes App" , where show noes of each subject or all subjects then in next activity show chapters, then third activity shows WebView with complete notes.

```
import ...

public class MainActivity extends AppCompatActivity {

    Button button;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        button = findViewById(R.id.button);
        button.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) { notes(); }
        });

    }
```

```
import ...

public class MainActivity extends AppCompatActivity {

    Button button;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        button = findViewById(R.id.button);
        button.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) { notes(); }
        });

    }

    public void notes() {
        Intent intent = new Intent(getApplicationCo
        startActivity(intent);
```

Notes

Artificial Intelligence
Artificial intelligence (AI) is a wide-ranging branch of computer science concerned with building smart machines capable of performing tasks that typically require human intelligence.

Machine Learning
Machine learning (ML) is the study of computer algorithms that can improve automatically through experience and by the use of data.

Mobile Applicaion Development
A blockchain is a growing list of records, called blocks, that are linked together using cryptography.[1][2][3][4] Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a Merkle tree).

Block Chain
Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous.

Python Django
Django (/ˈdʒæŋɡoʊ/ JANG-goh; sometimes stylized as django)[6] is a Python-based free and open-source web framework that follows the model–template–views (MTV) architectural pattern.[7][8] It is maintained by the Django Software Foundation (DSF), an independent organization established in the US as a 501(c)(3) non-profit.

Python Pandas, Numpy
NumPy (pronounced /ˈnʌmpaɪ/ (NUM-py) or sometimes /ˈnʌmpi/[3][4] (NUM-pee)) is a library for the Python programming language, adding support for large, multi-dimensional arrays and matrices, along with a large collection of high-level mathematical functions to operate on these arrays.

Data Science
Data science refers to the process of extracting clean

Task 12. Each student is required to create account on any three Freelancing websites and create their profiles with complete description. (Attach Screen shot of their accounts / pitch as assignment submission)

Video introduction ⊕

Hours per week ✎
More than 30 hrs/week

Languages ⊕ ✎
English: Basic

Education ⊕
University of Sindh ✎ 🗑
Bachelor's degree, software engineering
2019-2022 (expected)

android app developer ✎ $5.25/hr ✎ 🔗

I'm professionally android app developer and I do your work one or two days....
my name is Masooma Akbar Memon and i'm to hard worker and i'm too intelligent in studies so kindly you send your work.

Work History
No items

Portfolio ⊕

Showcase your work to win more projects
Add items to impress clients

each student must create account on these and start exploring the freelancing portals for online work.

IDEA   Student Software Developer Team/Group/Incubation

Step 1. Form a group of 3 to 4 students and create your own private software house/group/team.
Step 2. Name your Software developer Team/group.
Step 3. Start brainstorming on your skills and areas of expertise, i.e. PhP Web development, Android App, Graphics Designing, etc.
Step 4. Create a single account on Freelancer and Fiver websites as a Software Developer. Keep searching for projects from your expertise and start biding on them. **Step 5.** Try to create an interesting profile with portfolio showing all your work.

Those students who form a software developer group/team will be guided further on how to work better on freelancer websites and fiver.

Task 13 & 14: Create a Full Android App on any of the TWO (02) following topics. The Basic Wireframe of project is given below, You can use this UI wireframe or create your interesting UI. Your APP Must have three things (1. Splash Screen. 2. Main Activity and fragments 3. Display HTML notes in WebView .
App Idea 1. HTML Notes App
App Idea 2. CSS Notes App
App Idea 3. Multimedia Technology Nates App
                    App Idea 4.   Java Programming Notes App
        App Idea 5.   Android App Development Notes App

The Mobile App UI Wireframe was created using following website. Use this to create a quick design of your Website of Mobile App to show to customers/clients
